Every week we'll be encouraging you to notice features of the landscape in an artwork using Exhibit, a tool which provides an engaging and interactive experience similar to what you would have with the original piece.

If you have not already, look at 'View of St Salvator's Chapel tower' by Lady Mavel V. Irvine featured on Exhibit before going on your walk. You can find this here: [Exhibit | View of St Salvator's Chapel tower](#)

The seasons are changing, and we are starting to welcome Spring.

When you go on your walk today do you notice any difference in the smells?

Are there new plants, does the air smell fresher?

Do you notice any new colours emerging?

Like the blossoming tree in the painting, can you spot any new flowers? Perhaps you can just notice how much greener the trees have become recently.

Are there any other signs of the new season?

Can you spot animals out in the fields again? Have you noticed that people are wearing lighter jackets, or the absence of hats and gloves?

What can you hear on your walk?

Perhaps children playing outside, people chatting as they pass you on their walk, or people calling their dogs back.

We looked at the building with the different colours used to show texture.

Find something on your walk that you would paint and think of the colours that you would use.

We focused on St Salvator's Tower in the painting.

Keep an eye out and try and spot the tallest thing on your walk. Maybe it is another building, or a tree.

Look up to the sky and clouds.

What colours can you see? Can you make any shapes out of the clouds? Have you noticed it is lighter later now?

We also looked at the horizon.

At a point in your walk, take a moment to just look at the horizon in front of you. Are the features in the distance, different from the ones around you now?
