Museums

Every week we'll be encouraging you to notice features of the landscape in an artwork using Exhibit, a tool which provides an engaging and interactive experience similar to what you would have with the original piece.

*If you have not already, look at 'Landscape' by Evelyn Ince featured on Exhibit before going on your walk. You can find this here:*

When you go for your walk, take a moment to just listen to what is going on around you.

Maybe you can hear people chatting as they pass, children playing, or birds cawing in the distance.

Whilst on your walk take a moment to look at what you can see on front of you.

How do you feel? Is there any particular area you would like to focus on?

Do you think the time of day you have chosen to go for your walk has affected what you see and hear?

How is the weather today?

How is the weather affecting the environment around you? Are the colours you see different than what you normally see on your walk?

Museums

Look up to the sky and see what colours there are.

Are these colours different than others you have seen on your walk? If you look at the sky, could you determine what time of day it is?

Do you have a clear view of the sky, or are there other things obscuring the view?

If you can see any clouds, what shapes can you make out?

Whilst on your walk, keep an eye out for plants and trees around you.

What plants can you see? Trees, bushes, moss growing on brickwork? Are there any you haven't notice before?

There are many hills in painting on the horizon.

What can you see on your horizon?
